

# Add Product and product Settings

Currently we have a button to Add Products, which is perfect. However, the Page it opens should be adjusted. Just like the Taric Settings Page, the Products Settings Page should be related to a Single product only. At the same time, to increase User friendliness, it should also be possible to edit the parameters from the main page table.

It is valuable as a User when adding the Product under which Taric code this is done since the user enters a new Page after his selection. However, to keep the page clean the suggestion would be:

1. Mention the Taric code in the Left top like now, but make it a link that when the user should click it the user opens the Taric Settings page in a new Window;
- 2.
