

Taric info

The information coming from the Taric service should also be possible to look into as a User. This is already in place, but we need add one option, which is to allow the user to input the Origin, on which basis the applicable Measure types are filtered.

The screenshot displays the Taric service interface. At the top, there is a search bar and a breadcrumb trail: Taric Services > Customs Product Database > Details. The main content area is divided into several sections:
