

# Customs declarations or records

The outcome of the business rules define what customs declarations are lodged or what records are recorded. In terms of declarations for the application of customs procedures, the main rule is that declarations are done by means of EIDR. Exceptions to this main rule are:

1. Export declarations (B1 and B4). These are done via the normal procedure; and
2. In case preferred or required by law the Import declaration (H1).

## Simplified Declarations (I1)

Any declaration for the application of customs procedures, excluding Export, is done simplified, regardless of the way the declaration is done (i.e. via EIDR or normal procedure). Inherent to the nature of our business is that at the moment of declaring the goods, only planned quantities are known.

## Supplementary Declarations (H.)

Any simplified declaration goes into our supplementary declaration process after entry into the record. Once the quantities are measured and final, ATLAS sends through the ACTUAL figures, and the supplementary declaration is created. The supplementary declarations for Inward processing and Release for Free Circulation are automatically sent in within 10 days after the entry. Below an example of the Processed Supplementary Declaration page:

Trans. Ref.	Acceptance Date	MRN	Terminal	From	To	Taric Code	Product Name	Declaration Type	Normal Procedure	Status	Mass (KG)	Customs Debt Payable (€)	Customs Debt Notif.	Paid	Days Since Acceptance	Bzctrl inc.	Tran.	Decl.

All Declarations are available content wise from the Transaction Details page, the Declaration overview Page and the Supplementary declaration page. This includes an overview of the messaging and options for a User to utilize with regards to the specific Declaration. Below an example of the part of the Transaction Details Page where the Declarations are listed.

Step 4. Customs Products and Business Rule Engine Results												
Product	Customs Status	Activity Ref.	Origin(s)	Destination	Consignee Ref.	Normal Proc.	Rule	Results	Results Message Or Record	Document 1	Document 2	Document 3
[Diesel <= 10 ppm] (2710194490)	EXCISE_CONTROLLED	NM 000 384F1	-	GB	-	Yes	EXP_BR01	IE815:B1	B1 - Export	Export e-AD	EX A	-

  

Step 5. Declaration Queue
<ul style="list-style-type: none"> <li>[Diesel &lt;= 10 ppm] (2710194490) <ul style="list-style-type: none"> <li>Submitted draft of E-AD (IE815) <ul style="list-style-type: none"> <li>Submitted draft of E-AD (IE815)</li> </ul> </li> <li>Export declaration (B1) <ul style="list-style-type: none"> <li>Export declaration (B1) - 0 Errors</li> </ul> </li> </ul> </li> </ul>

The Declarations can be selected to go to the Declaration details page.

## Content declarations

The content of the declarations is determined on the basis of:

1. Input from the User on the basis of information received from the Customer via the Nomination. Such as the Product and its Commodity Code, the Customs status, the origin, the customs value, etc.;
2. The application of business rules. For example, in case of a Release for Free Circulation the procedure codes are determined on the basis of certain parameters. Below we have included an example where the Current Procedure Code is dictated by the fact that it concerns Excise controlled goods and the Previous Customs Code is based on the fact that it concerns goods coming from IP.

Decision Table Rule Details

Decision Table Code  
PROCEDURE\_CODES

Rule Code  
PROCEDURE\_CODES\_BR1

Active

Rule Description  
H1 excise goods, ip flag, no inf3

Define Conditions

Number Of Rules  
4

Sequence	Consolidation Start	Key	Value	Consolidation End
1	IF	Customs Declaration	= Release for free circulation (H1)	
2	And	Is Goods coming from Inward Processing	= True (Yes)	
3	And	Is Excise goods - component	= True (Yes)	
4	And	Supporting Documents	not contains Informatieblad INF3	

Define Outcomes

Number Of Outcomes  
2

Sequence	Key	Value
1	Current Customs Procedure Code	45
2	Previous Customs Procedure Code	51
