

# Registering a Means of Transport

As described, handling Product starts with Product arriving at the Terminals. As the Product cannot arrive by itself, the start is registering the Means of Transport that is expected to arrive to discharge (or load) Product. The registration of such a Means of Transport is done by means of a so-called Visit.

A Visit is the combination of the name and/or identification number of the means of Transport together with the estimated time of arrival. This is required, because a Means of Transport can visit the de Terminal multiple times, even in a timeframe of a couple of days. Therefore, it is important to be able to make the distinction between the different visits and hence the reason for the concept of a Visit.

Given the differences in terms of data regarding various types of Means of Transport, different types of Visits can be created to accommodate proper data recording.

The screenshot shows a software interface for managing visits. At the top, there is a navigation bar with the following items: **Visits**, Marine, Road, Rail, Pipeline. Below the navigation bar, there is a search bar with a magnifying glass icon and a 'Go' button. To the right of the search bar, there is an 'Actions' dropdown menu and two checkboxes: 'Include cancelled' and 'Include departed'. Below the search bar, there is a table with the following columns: Visit number, MoT name, Nomination Type, Product, and Company. The table contains two rows of data.

Visit number	MoT name	Nomination Type	Product	Company
VS 000 167	ALVANITH	Load marine	Intermediate Fuel S >0.5	Vitol S.A. ( Vitol S.A. (Fuel Desk) )
VS 000 168	AMALIE ESSBERGER	Discharge marine	M100 Cracked > 0.5	Vitol S.A. ( Vitol S.A. (Fuel Desk) )
